

The Town has begun the process to update the Residential Design Guidelines. Planning staff and the Town's Consulting Architect, Larry Cannon of Cannon Design Group, are working with the General Plan and Historic Preservation Committees to develop a draft document. The Town currently has separate design guidelines for historic and nonhistoric residential sites. These documents will be incorporated into a single Town-wide document.

The public is welcome to attend General Plan and Historic Preservation meetings and provide input. For more information about the Residential Design Guidelines or the General Plan Committee and/or Historic Preservation Committee meetings schedule, contact the Community Development Department at 354-6872.
